

Position Statement on Antibiotic Stewardship

TYSON FOODS, INC.

Position Statement on Antibiotic Stewardship

This is because untreated animal disease has a negative impact on natural resource utilization within animal populations which drives greater environmental impact (greater greenhouse gas emissions, land use and water intensity). Additionally, there is an ethical component that must be considered as animal disease may contribute to reduced accessibility to safe, affordable food. As antibiotics are important tools for veterinarians to maintain animal health, these broader impacts
